

ABSTRACT

A method and apparatus for conducting a wagering game are disclosed. A value input device receives a wager from a player to play the wagering game. A processor is operative to initially associate one or more of a plurality of incomplete offers with the player. A display is adapted to display the plurality of incomplete offers. The processor, in turn, is operative to allow the player to change which of the incomplete offers is associated with the player, and after the player changes which of the incomplete offers is associated with the player, complete the plurality of offers and award the associated offers to the player.
